## Dover Black

A heavy texture, non-weathering and unfading stone with a level of quartz that provides a glistening sheen. Our Dover Black is the **only** product approved as an alternate for Buckingham Slate on historic restorations by the National Park Service, Virginia Department of Historic Resources and Historic Arlington Landmark Review Board.

Comparable slates: Very similar in look and physical properties to domestic black manufactured in Buckingham, Virginia and Peach Bottom Slate once manufactured in Pennsylvania

Property	Value	ASTM Test Method	ASTM Grade
Modulus of Rupture	669 lbs. at 0.244 in	C-120 - 06	S1
Absorption	.14 %	C-121-06	S1
