## Black Diamond Gray/Black

An excellent unfading gray/black slate for a traditional look with medium to heavy texture.

Provides a blend of dark grays and blacks for contrast on the roof.

Standard Thickness is ¼" to 5/16" and is available up to ¾"

### Comparable Slates

Color resembles historic Virginia Buckingham and Pennsylvania Black slates produced over the last century with a more uniform texture, slight variations of color and less sheen.

Also similar to Vermont Blacks yet the Black Diamond is a true unfading slate.

*Timeless Natural Beauty & Unparalleled Durability to last a Lifetime*
